

Cloud Title — Content & Asset Gap List

For: Thomas Heimann **From:** Mohammad (build team) **Date:** 2026-06-24 **Status:** Editorial direction locked ✅ · Scaffolding complete — homepage + 6 subpages are now live in the demo. This list is everything we need from you to take it from skeleton to final-ready.

Demo: <https://cloudtitle-demo.vercel.app/editorial> — click through the whole skeleton as you read this.

How to use this doc:

- ✅ = already in the demo (placeholder or your final copy — see note)
- ⌚ = waiting on you
- ? = we need a decision from you
- 📁 = legal/compliance — verbatim only, do not let us paraphrase

We'll knock these out in batches. Don't try to do it all at once. Reply in the thread or send a Google Doc / Loom — whatever's fastest.

1. Homepage — what's still a placeholder

1a. Testimonials ⌚ (HIGH PRIORITY)

Three quotes currently on the page are clearly marked as **placeholder** — "Maria L., Coral Gables", "James K., Naples", "Sofia R., Tampa Bay". Since Safe Listing™ is the flagship, real agent voices here do the heaviest lifting on the whole page — this is the single highest-impact thing you can send us.

We need from you:

- 3–6 real agent testimonials (1–3 sentences each) — ideally a couple that mention Safe Listing™ by name
- Agent first name + last initial, role, city (e.g. "Realtor · Coral Gables")
- Written **permission** to use the quote on the public site (a forwarded email saying "yes you can use this" is fine)
- Optional but ideal: headshot or brokerage logo for each agent

1b. Case studies ⌚

Two case mini-cards on the page right now:

- "\$850K Home – St. Petersburg — Unrecorded mortgage satisfaction — Closed 11 days after contract"
- "\$1.2M Waterfront – Naples — Probate incomplete — Closed on time"

Confirm: Are these real closings? Can we name them this way publicly? If yes — ☒ done, nothing more needed. If no — give us 2–3 real anonymized examples in the same shape:

| *Property type + price band + city · Issue we found · Where we found it · Outcome*

1c. Hero stats ☒ (just confirm — these came from you)

Good news: these are already on the page and pulled **verbatim from your brief**, and they already carry the "Based on internal averages" disclosure where required. We're not asking you to dig up new numbers — we just need a quick green light:

- **\$127M+ closed in 2025** — confirm the figure is still accurate and cleared to publish. (Stays labeled "Based on internal averages.")
- **4.9 / 5 rating** — small thing to clean up: your copy refers to this in two places, once as "rated by Florida agents" and once as a "Google Rating." Tell us which is correct so the disclosure footnote is accurate (e.g. "4.9/5 on Google" vs. "internal agent survey").
- **"Hundreds of Florida agents"** — fine as-is, but if you have a sharper number ("400+ agents") it reads stronger. Optional.

1d. Photography ⌚

The Editorial direction leans on strong imagery. Right now we're using AI-generated placeholders. We don't want to push you toward an expensive photo shoot for this — there are cleaner, low/no-cost paths, and you already run your own AI stack. Here's how we'd suggest handling it:

Three budget-friendly options (mix and match):

1. **You forward existing photos** — if you already have brand photography, send us the highest-res files. Best option wherever you have it.
2. **AI-generated** — either you generate them on your own stack to our brief, or we generate them for you. Great for coastal Florida architecture, abstract/atmospheric, and section backgrounds.

3. **Free editorial-grade libraries** — we curate options from Unsplash / Pexels / Openverse (properly licensed, free to use) and send you a shortlist to pick from. Works well for Florida coastal + architectural shots.

The one thing none of those can fake: your real team and office. For the team portrait / About page, even a clean daylight phone photo of you and key staff beats any generic image. If you can grab a few, send them.

What "good" looks like for this direction (so whatever path we take stays on-brand):

- Real Florida feel — coastal, waterfront, mid-century / modernist architecture detail
- Natural daylight, warm and editorial — not stocky or over-lit
- Candid over posed — no generic handshake / suit-and-tie stock clichés
- Wide / atmospheric shots that give text room to breathe

Want us to put together a small visual moodboard of free + AI options for you to react to? Say the word and we'll send a few directions.

1e. Underwriter logos

We say "Underwritten by Fidelity & First American" — we need the **approved logo files** (SVG) and any usage restrictions from your underwriter agreements. Some underwriters require pre-approval before their logo appears on agent-facing marketing. You mentioned you can pull these — whenever you have them.

2. CTA destinations — where do these buttons actually go?

The demo CTAs all point to placeholder anchors. For the real Divi build we need the live destinations. (All form CTAs connect to GoHighLevel.)

Button	Currently	What we need
Make Escrow Deposit (new nav CTA)	#escrow-deposit	The URL of your existing escrow deposit page/portal — we'll just link the button to it
Submit Order (renamed from Start Safe Listing)	#start	GoHighLevel form URL or webhook ID

Get My Free Listing Advantage	#start	Same as above? Or a different intake form?
Watch 2-Minute Demo	#demo	Loom / YouTube / Wistia URL of the demo video
Schedule 15-Minute Call	#	Calendly / GoHighLevel booking URL
Submit Rush Title Order	#	Same as Submit Order, or a separate rushed-priority form?
Reserve My Spot (onboarding cap)	#	Calendly URL — same as the 15-min call?
Get My Free Title Pre-Clearance	#start	GoHighLevel form ID — and confirm the 5 fields are right (Property Address, Name, Email, Phone, MLS#)

We can launch with internal anchors and swap them later, but the sooner we have these the cleaner the Divi build.

3. Demo video

Three CTAs reference video content that doesn't exist yet:

- "Watch 2-Minute Demo" (homepage hero)
- "Watch 5-Minute Demo" (final CTA section)
- "See AI Search Visualization" (AI difference section)

Decision needed:

- (a) Record one **2-min demo** and reuse it for both CTAs, drop the 5-min option
- (b) Record both (2-min for hero, 5-min for final CTA — cut from the same recording)
- (c) Drop video for launch, replace those CTAs with "Schedule a Call"

Cheapest path: a Loom screen recording of you walking through a sample listing in your portal. We can edit to length.

4. Subpages — scaffolded , now confirm the list

We've scaffolded the core set on the Editorial system (all live in the demo now). Per your note about staying in the real-estate / service-provider lane, we held off on consumer-facing buyer/seller pages — flagged below as optional. **Mark each one** keep / cut / rename — and flag anything we missed.

#	Page	Status	Notes
1	Safe Listing™	 scaffolded	Full program detail — long-form. Eligibility, pricing, FAQ, sign-up. Highest conversion intent.
2	For Agents	 scaffolded	Your main audience hub. Pricing, co-marketing assets, referral program if you have one.
3	About / Our Story	 scaffolded	Team bios, founding story, why AI-first, license info
4	Make Escrow Deposit	 scaffolded	Landing for the new nav CTA — explains process + links to your portal
5	Submit Order	 scaffolded	Form + what to expect after submitting
6	Contact	 scaffolded	Phone, hours, addresses, contact form
7	Services		Title insurance, escrow, closing, 1031 (do you?), commercial title (do you?) — want this as its own page?
8	Resources / FAQ		Glossary, agent checklists, downloadable PDFs
9	Areas Served		67 counties — county-level landing pages for SEO, or one map page?
10	Blog / Insights		Do you want one? If yes, who's writing?
11	For Sellers		Optional — you said "stay in the real estate lane," so likely skip unless you want it
12	For Buyers		Same — optional

13	Legal (Privacy, Terms, Accessibility, RESPA)		We need your attorney-approved versions
----	---	---	---

5. Brand assets

We have the cloudtitle.com logo and have extracted the navy/maroon palette. Still need:

- **Logo SVG** (vector — not just PNG) in both color and reversed/white versions
- **Favicon source** (square, 512x512 minimum)
- **Approved color hex codes** — we've inferred from cloudtitle.com but want your sign-off
- **Brand font licenses** if you own any (otherwise we use Google Fonts and you're covered)
- **Office address(es)** for the footer
- **Phone, fax, hours**
- **Social URLs** (LinkedIn, Facebook, Instagram, YouTube?)
- **Mailing list signup** — do you have one? Mailchimp? GHL?

6. Legal & compliance

Verbatim only. Send us the source — we will not write or paraphrase any of this.

- **RESPA disclosure** language (you have one — we need the exact text and where it must appear)
- **Privacy policy** (your attorney's version)
- **Terms of service**
- **Accessibility statement** (Florida title agencies are increasingly being targeted — we recommend a WCAG 2.1 AA statement)
- **Guarantee language** verbatim:
 - Zero Risk Guarantee
 - Speed Guarantee
 - Accuracy Guarantee
 - Transparency Guarantee
- **Florida title license number(s)** — for the footer

- **NMLS / agency ID numbers** if applicable
 - **Underwriter agreement disclosures** — anything Fidelity or First American requires you to display
-

7. Integrations — for the Divi build phase

Not blocking the design phase, but please start collecting:

- **GoHighLevel** — the form webhook URL or sub-account ID we should point the forms at
- **Email autoresponder** — what should happen after a form submission? (confirmation email, internal notification, pipeline tag, etc.)
- **Calendly / GHL booking** — the account/link for the "Schedule a Call" CTAs

Access we'll need (whenever it's convenient — no rush): to wire up tracking properly at launch, we'll need access to, or the IDs for:

- **Google Analytics 4** — property ID, or add us as a user
- **Google Tag Manager** — container ID, or add us as a user (if you use GTM)
- **Reviews widget** — if you want live Google reviews pulled in, the source/account

Note: We are **not** integrating with your escrow software (Qualia / SoftPro / etc.) — the "Make Escrow Deposit" button simply links to your existing deposit page (see Section 2). No software integration on our side.

8. Things you DON'T need to send right now

We have enough to scaffold every page and bring it to a near-final state. You can fill in the gaps above as you have time. The **only true near-term priorities** are:

1. **Real testimonials** (1a) — even just 3 we can use publicly
2. **Case study confirmation** (1b) — keep the two we have, or replace them
3. **Confirmation of the subpage list** (Section 4) — which to keep, which to cut, which to add
4. **Make Escrow Deposit destination URL** (Section 2) — so the new CTA actually goes somewhere

Everything else can come in waves.

What happens next on our side

Editorial is locked and the skeleton is up. As your content comes back, we will:

1. Swap placeholders for your real copy, testimonials, and imagery
2. Bring each subpage to near-final on the Editorial system
3. Iterate page-by-page with you (2 revision rounds per page)
4. Move into the WordPress + Divi 5 build once the design is signed off

Click through the demo, reply with the priorities above when you're ready, and we'll start the first batch.
